# GLADIOLUS

II

*"Best by Every Test"*

## Homewood Gardens

III

GIG HARBOR, WASH.

G. SCHWESINGER

## GREETINGS

To my friends and customers:

The American Gladiolus Society has done much for the advancement of the Queen of Flowers.

In Aug. 1925 at Rochester, N. Y., the members voted unanimously to adopt Gladiolus as proper for both singular and plural forms. The word Gladioli is now out of date. You will no longer need to stutter when you name your favorite flower. A smile of Tolerance for those who die hard. The rest of us will call them "Glads," which truly fits the flowers. In a comparatively short time the Gladiolus has risen from obscurity known to a few 'til at present it is grown by the millions, by the masses as well as the classes.

A garden without its "Glads" is like a summer without sunshine, a hearth without a fire. As a cut flower it has no equal. If cut when the first bud shows color it will unfold its gorgeous flowerets to the tip, in water.

The Puget Sound country is known as the Holland of America, and as a bulb growing locality is fast becoming famous. The adjectives and synonyms we once used to describe our mild, moist climate, and formation of soil, are now superfluous.

Bulb growers and bulb buyers all over the world recognize the stamp of Puget Sound as a guarantee of Quality.

Orders filled in the order received and sent postpaid in U. S. and Canada on orders of \$2 or more. On small orders please include postage. Order early while stock is complete and if possible give second and third choice and if for any reason the bulbs when received are not satisfactory, return at once and I will cheerfully refund your money.

Terms: Cash with order for immediate delivery. A deposit of 25 per cent of order will hold order for future delivery. Money order, bank draft or personal check accepted.

This list of choice named varieties represents "the best by every test," arranged alphabetically for your convenience. The name in parenthesis signifies the originator which means much to the "glad" fan.

	Each
Alton (K) Magnificent new gladiolus of gorgeous orange shade, heavily ruffled .....	.25
A. W. Hunt (K) Fine large orange red .....	.75
Albania (Kemp)...A wonderful new white, broad glistening petals with crimped edges sometimes flushed delicate pink. Excellent keeping qualities and many large flowerets open at once, well spaced makes it an ideal cut flower .....	.25

Col. No. 4. 25 bulbs for \$3.00. This assortment we guarantee to be double your money's worth or your money back.

### CULTURAL DIRECTIONS

Gladiolus may be planted any time the ground is in good condition and danger of frost is over, in our climate about May 1st. Large bulbs should be planted five to six inches deep, small bulbs, less. The roots go down, so the ground should be well pulverized and enriched below as well as above the bulbs. They should have full exposure to the sun and not where roots of trees or shrubbery sap the ground. Cultivate enough to keep down weeds and do not let a crust form around young plants. Water once a week if necessary. After tops are killed by frost, lift carefully and dry in sun for two days. Separate tiny bulblets or cormels from bulb and store in cool, dry place in ventilated boxes safe from frost. The little offsets around the bulb are your increase. Take care of them.

The Lord God planted a garden,  
In the first white days of the world.  
And set there an angel warden.  
In a garment of light unfurled.

So near to the peace of Heaven,  
The Hawk might nest with the Wren;  
For there, in the cool of the Even,  
God walked with the first of men.

And I dream that those garden closes,  
With their shade and their sunflecked sod  
And their Lillies and bowers of Roses,  
Were laid by the hand of God.

The kiss of the sun for pardon,  
The song of the bird for mirth;  
One is nearer God's heart in a garden  
Than anywhere else on earth.

—Dorothy Frances Gurney
